Position

Authorization

The **Builder** indicated (an authorized representative of the company building the home) desires to offer to program participants the possibility of purchasing energy efficient new homes that meet the requirements of the **New Home Energy Savings Program**. The builder indicated agrees to the following:

The **Builder** will,

- have the home plans **evaluated** by a licensed New Home Energy Savings Program Service Provider to ensure the home reaches at least one of the available incentive levels and all other program requirements, as specified in the program guidelines;
- be responsible to build all homes<sup>1</sup> in accordance with the plan evaluation report and will ensure that the home meets all program requirements;
- allow and facilitate occasional on site visits by NB Power personnel for Quality Assurance purposes;
- sign and agree to the conditions of a Financial Incentive Transfer Form in cases where applicable incentives are directed to different participants involved in the program (**Builders** or **Homebuyers**);
- indicate in the Construction Contract and/or Purchase and Sales Agreement, a line item showing all financial incentives provided by **NB Power**, to the builder or that are available for transfer to the builder; and
- attend program and technical training seminars provided by NB Power to ensure their familiarity with program and technical requirements, and best practices in energy efficient new home construction.
- Agree to and sign an *EnerGuide Rating System – Builder Licence Agreement* with Natural Resources Canada; your chosen Service Organization can help with this requirement.
